Bajaj Auto Limited

Equity Research January 24 2024

Soaring High

Bajaj's 3Q EBITDA and PAT rose 37% YoY to new all-time highs (both inline with JEFe). We continue to like Bajaj as we believe Indian 2W industry is poised for a strong cyclical recovery; exports appear to be bottoming too. Bajaj is expanding its EV portfolio and network, and has risen to #3 position in Indian E2Ws. We expect 19% EPS CAGR over FY24-26E and our FY25-26 EPS are 7-11% above street. We fine-tune estimates and retain Buy with a revised Rs9,000 PT.

Another strong quarter: Bajaj's 3Q EBITDA and PAT grew 37% YoY to new all-time highs (both inline with JEFe). Volumes grew 22% YoY as the strong 43% YoY growth in domestic more than offset the 4% YoY decline in exports. ASPs fell a slight 1% QoQ on weaker mix (lower share of 3Ws in volumes). EBITDA margin still expanded 30bp QoQ to 20.1%, boosted by softer commodity prices; EBITDA/vehicle was flat QoQ at Rs20K.

Indian 2Ws poised for strong rebound: We believe Indian 2W industry is poised for a strong cyclical recovery; we expect industry volumes to grow 11% in FY24E followed by 15% CAGR over FY24-26E. Bajaj said that demand has held up well in December post the festive season, and it expects motorcycle industry to grow 8-10% in coming months. Bajaj also has a strong product launch pipeline with 2-3 upgrades every month till April-May, launch of a bigger Pulsar in 1QFY25 and a CNG based motorcycle in FY25.

Exports bottoming: Local currency depreciation, FX availability constraints and high inflation, along with the Red Sea issue, are posing headwinds for exports; however, the worst seems to be behind. Bajaj's export volumes, although down 4% YoY, rose 2% QoQ in 3Q - third consecutive quarter of sequential improvement. Bajaj said that Latin American and Middle Eastern markets have surpassed previous peaks; however, African and South Asian regions are still 50-70% of previous peaks. We factor Bajaj's monthly export volumes rising from 141K in 3Q to 151K/171K in FY25/26E (FY22 was 209K).

Rising focus on electrification: Bajaj has risen to #3 position in Indian E2Ws in Oct-Dec, surpassing Ather, with market share of 13%. Bajaj intends to expand its E2W availability from 140 cities currently to 200 cities and further ramp up volumes in coming months. It also plans to launch a new E2W, and start E2W exports in FY25. Bajaj's electric 3W is also getting good reception and the company plans to expand presence from 23 cities currently to 50 cities by March-end and 200 cities by mid-FY25.

Retain Buy: We fine-tune estimates and expect a strong 30% EPS growth in FY24E, followed by 19% CAGR over FY24-26E; our FY25-26E EPS are 7-11% above street. Stock is trading at 23x FY25E PE vs last 10-year average of 17x; however, we believe a premium is justified given the strong growth outlook in coming years. Stock also offers 3-4% dividend yield. We retain Buy with a revised Rs9,000 PT at 24x FY26E PE.

Stock selection is based on fundamental analysis and may take into account other factors such as analyst conviction, differentiated analysis, a favorable risk/reward ratio and investment themes that Jefferies analysts are recommending. Jefferies Franchise Picks will include only Buy rated stocks and the number can vary depending on analyst recommendations for inclusion. Stocks will be added as new opportunities arise and removed when the reason for inclusion changes, the stock has met its desired return, if it is no longer rated Buy and/or if it triggers a stop loss. Stocks having 120 day volatility in the bottom quartile of S&P stocks will continue to have a 15% stop loss, and the remainder will have a 20% stop.
